

Membership

"Thank you for your interest in becoming a member of the Rust Foundation. Our members are vital to the important work of stewarding the Rust programming language for an increasingly global community of users, maintainers, contributors, & adopters.

Together, we can expand the security, stability, & innovation of the Rust programming language for all. I hope you'll join us!"

Dr. Rebecca Rumbul
Executive Director & CEO
The Rust Foundation

Our Mission

The Rust Foundation is an independent, non-profit organization dedicated to a future where global computer systems are more secure, efficient, and performant through the use of the Rust programming language. We support the Rust Project and Rust community by funding the core infrastructure and security of Rust as well as targeted community initiatives.

Our Values

Independence

Security

Inclusivity

Sustainability

Open Collaboration

- Stipends and financial support packages for new and existing Rust maintainers
- Community development initiatives
- Rust Foundation operations, administration, and all legal obligations

... and more!

RUST FOUNDATION MEMBERS FUND...

* Data collected from 2024 budget projections.

Words from Our Members

"We are glad that the Rust Foundation is in place to work with stakeholders to sustain and grow this participatory open source ecosystem, through active collaborations, initiatives, and funding. Becoming a member of the Rust Foundation is a natural step for us to make a small contribution to the Rust ecosystem."

- Nathan Foo, Co-Founder & CTO of AppFlowy (Silver Member)

"Powering commerce for millions of merchants requires systems built to scale and perform, and Rust is a big part of Shopify's strategy for building those systems. Becoming part of the Rust Foundation supports Rust's growth, as well as the Rust community and ecosystem."

- Mike Shaver, Distinguished Engineer at Shopify (Gold Member)

"As a Platinum Member of the Rust Foundation, Microsoft is able to collaborate with the Rust community more closely, allowing us to better support the development of the Rust language, provide tooling and library support, create learning resources, and more."

- Nell Shamrell-Harrington, Principal Software Engineer at Microsoft & Vice-Chair of the Rust Foundation Board of Directors (Platinum Member)
